Subject: Re: your studio contributions to the Neighborhood Initiative database

Dear Cynthia,

You have my premission to include both the the 2008 Bliss Area Urban Design Studio, and last spring's studio on Secteur 35 in the Neighborhood Initiative database. As for the actual files of students' work I have them as hard copies and pdf format. You are welcome to use both. We can discuss this during our meeting tomorrow.

Very best,

Robert

Dear Robert

I know we talked about this long ago, but we would like to include in our Neighborhood Initiative database being set up as a permanent record with the Jafet Library your two studios – the 2008 Bliss Area Urban Design Studio, and last spring's studio on Secteur 35.

If you agree, I need your permission in writing that we may include the studios in the database. I also need the actual files containing the final presentations of the students. If you could send me the first by e-mail reply that would be great, and then we can work out how to actually get the digital files from you.

Many thanks, Cynthia
