This book targets children between 4 to 6 years old.

It raises awareness in children regarding their everyday life habits and experiences with technology, seeing the consequences of both good and bad ways of balancing in life.

Fadi is a 6 year old lazy boy
who stays on his Ipad all day long.
He doesn't interact
in family gatherings.

He doesn't even play sports like football, basketball, swimming or park games. That's why Fadi is always sick.

Rami is Fadi's twin brother. He uses his Ipad sometimes, not as much as Fadi.

He plays sports with his friends and studies on a daily basis.

A hand is shown holding several paintbrushes. The brushes have different colored tips: red, blue, yellow, and green. The background is a light, textured surface, possibly a canvas or paper, with some faint, abstract shapes in blue and yellow.

He visits his family members and goes to his “Beit Jeddo” several times a week, unlike Fadi.

One day, Fadi and Rami had a mathematics test. Rami was studying, but Fadi was not.

Guess what?!

He was sitting on his sofa and playing on his Ipad as usual. So, Rami started encouraging him to study and asked him: “ Fadi, come on! You have to study in order to become an excellent student”. But Fadi didn't care.

Then, his mom enters and talks to him saying: “Fadi, my lovely boy, you have to start studying in order to get an A in your exam. Come on! I will get you a big gift if you do well.” Again, Fadi refuses and continues playing on his iPad.

The next day, during the exam, Rami was solving and doing really well, while Fadi was playing with the exam paper. So, the teacher screams at Fadi: "Come on Fadi! Start solving your exam please."

An illustration of a hand holding a pencil and a pen over an open notebook. The hand is holding a pencil with a green eraser and a green band, and a blue pen. The notebook is open, showing a yellow page with a blue star and a blue arrow pointing to it. The background is a light blue and yellow gradient.

They got their exams back, Rami got an A+ and was rewarded with a very big gift from his parents. He became the star of the class!

A hand is shown holding a pencil and a pen over a stack of papers. The pencil is yellow with a pink eraser and a blue band. The pen is blue with a silver band. The papers are white with blue lines. The background is a soft, out-of-focus yellow and white.

But, Fadi failed the exam because he didn't study for it and he was playing on his Ipad all the time.

This made Fadi feel so angry because he wants to be like his brother Rami. He wants to be the star of the class and get a gift.

A collection of colorful paintbrushes and a green marker are arranged on a white surface. The brushes have wooden handles and are filled with various colors of paint: yellow, red, blue, and green. The green marker has a green cap and a green band. The background is a soft, abstract wash of yellow and blue colors.

So, Fadi started to play with Rami and his friends, but he still spent time on his iPad.

Then Fadi became just like Rami, a good and active boy. He plays sports, studies, visits his friends and “Beit Jeddo” every day, and plays with his Ipad for 2 hours a day only.

At the end of the school year, Fadi became the star of the class and got an A+ grade. His parents were so proud of him and brought him gifts every time he achieved something new.
